ABOUT UNITED FOR ALICE AND OUR PARTNERS

ALICE in the Crosscurrents: COVID and Financial Hardship in Louisiana is brought to you by [Louisiana Association of United Ways](#) in partnership with [United For ALICE](#), a driver of innovative research and action around financial hardship for **ALICE** (Asset Limited, Income Constrained, Employed) households. With a commitment to [racial and economic justice](#), United For ALICE and United Ways across Louisiana share this work with foundations, government, corporations, and other nonprofits to inform policy and promote positive change for ALICE households. The grassroots ALICE movement, developed by United Way of Northern New Jersey, has spread to 27 states and the District of Columbia. Learn more about the ALICE movement [here](#).

To create the ALICE Reports, our [team of researchers](#) works with [Research Advisory Committees](#) composed of experts from our partner states. This work is guided by our rigorous [methodology](#), which is updated biennially with experts from across our Research Advisory Committees.

Director and Lead Researcher: Stephanie Hoopes, Ph.D.

ALICE Research Team: Andrew Abrahamson; Ashley Anglin, Ph.D.; Catherine Connelly, D.M.H., M.A.; Max Holdsworth, M.A.; Dana Isaac; Dan Treglia, Ph.D. Research Fellows: Daniel Assamah and Kathleen Lopez.

Louisiana Association
of United Ways

LETTERS TO THE COMMUNITY

Louisiana Association of United Ways

Message from Sarah H. Berthelot, President and CEO

ALICE lives in every town and every parish in our state – working as child care providers, aides for the elderly, cashiers, mechanics, waiters, and so much more. Each and every day, we witness countless ALICE workers provide essential services that keep our economy moving, often times without adequate health care access and optimal child care supports. They are our friends, family, and people we rely on every day – through good times and hard times.

Thank you for taking time to learn about ALICE in Louisiana. When ALICE can improve financial stability, we are all stronger and more prosperous.

A very special thanks to the Entergy Corporation for their generous support and activism for ALICE. The Louisiana Association of United Ways is also grateful for the partnership of United Ways throughout our state and the countless governmental, nonprofit, and business partners who work to find ways to help ALICE.

To access a digital copy of this publication, you can visit launitedway.org/ALICE. You can also access expanded ALICE data and resources for Louisiana at UnitedForALICE.org/Louisiana.

Entergy Corporation

*Message from Patty Riddlebarger, Vice President
of Corporate Social Responsibility*

Entergy is pleased to partner with United Ways throughout Louisiana to bring forth the ALICE Report for Louisiana. It is an honor to serve as the Louisiana statewide sponsor since the inception of this project in 2016.

At Entergy, our focus on ALICE is rooted in the economic reality of the communities we serve – we know ALICE well.

That's why we are proud to have partnered with United Ways this past year to provide more than \$4.4 million in utility assistance, which reached thousands of Louisiana families living below the ALICE Threshold. Our joint focus on Volunteer Income Tax Assistance (VITA) provides free tax preparation services for Louisiana ALICE workers so they can access much-needed tax credits to support their families.

Entergy is deeply committed to equipping ALICE families with the tools to succeed while also inspiring action from businesses, policymakers, and communities to build stronger financial stability for hardworking families throughout Louisiana.

ALICE RESEARCH IN A TIME OF CHANGE

This ALICE Report provides the first look at the extent of financial hardship in Louisiana using ALICE metrics since the COVID-19 pandemic began. The pandemic has disrupted longstanding patterns in how and where people live, work, study, save, and spend their time. And the story of ALICE and the pandemic is still unfolding as this Report is being written, amid an ongoing health crisis and an economic and public policy landscape that continues to shift. In a time of change, United For ALICE remains committed to providing the most up-to-date local data possible on financial hardship in Louisiana and across the U.S.

Two pillars of the ALICE measures are household costs and income. The **Household Survival Budget** calculates the cost of household essentials for each parish in Louisiana and relies on a wide range of sources for the budget items of housing, child care, food, transportation, health care, and a smartphone plan, plus taxes.

For household income, the ALICE measures rely on the U.S. Census Bureau's American Community Survey (ACS). The ACS experienced such significant [disruption in data collection](#) in 2020 that the Census Bureau released only experimental estimates, which are not included in our analysis. By 2021, standard Census data collection had resumed.

Household costs are compared to household income to determine if households are **below the ALICE Threshold**. This includes both households in **Poverty**, with income below the Federal Poverty Level (FPL), and those that are **ALICE**, with income above the FPL but below the cost of basics.

Our standard ALICE data is based on the ACS — both [household tabulated data](#) and individual data from the

KEY TERMS

- **ALICE: Asset Limited, Income Constrained, Employed** — households that earn above the Federal Poverty Level (FPL) but cannot afford the basic cost of living in their county. Despite struggling to make ends meet, ALICE households often do not qualify for public assistance.
- **ALICE Threshold of Financial Survival:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford housing, child care, food, transportation, health care, and a smartphone plan, plus taxes. Calculated for all U.S. states and counties.
- **Below ALICE Threshold:** Includes people in poverty-level and ALICE households combined.

[Public Use Microdata Sample](#) (PUMS) records. In addition, this Report includes our analysis of two surveys that capture the experiences of a nationally representative sample of households during the pandemic:

[Federal Reserve Board's Survey of Household Economics and Decisionmaking \(SHED\)](#), October, 2019; November, 2020; and November, 2021

[U.S. Census Bureau's COVID-19 Household Pulse Survey](#) (Household Pulse Survey), August 19–August 31, 2020; September 14–November 14, 2022; and December 9–December 19, 2022

Learn more about our methodology at: UnitedForALICE.org/Methodology

Data Notes: The data used in this Report are estimates; some are geographic averages, others are one- or five-year averages depending on population size. Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%. ALICE analysis includes all households, regardless of work status, as employment is fluid and most households have members who are working, have worked, or are looking for work.

THE ALICE HOUSEHOLD SURVIVAL BUDGET

The ALICE Household Survival Budget is the foundation of the ALICE research. This budget calculates the bare-minimum cost of the household basics needed to live and work in the modern economy by household composition, in every county.

When compared to the more accurate cost of living included in the Household Survival Budget, the Federal Poverty Level (FPL) is drastically inadequate. Unlike the ALICE budgets, the FPL is not based on the cost of contemporary household necessities, and except for Alaska and Hawai'i, it is not adjusted to reflect cost-of-living differences. Nor does it adjust for different ages of household members. The FPL is increased annually based on the Bureau of Labor Statistics' (BLS) Consumer Price Index (CPI), and those increases are the same for all U.S. households of a given size. By contrast, the actual household costs in the Survival Budget have increased at slightly different rates depending on location, household size, and household composition.

Yet despite its inadequacies, the FPL continues to be the standard for determining the number and proportion of people living in poverty in the U.S. **With the FPL as the primary way for policymakers and local stakeholders to gauge the extent of financial hardship in their communities, a huge portion of struggling U.S. households go unrecognized.**

Across Louisiana, for all household sizes and in all locations, the FPL is well below the Household Survival Budget. In 2021, the FPL was \$26,500 for a family of four. In contrast, Figure 1 shows that the average cost of living for a family of four in Louisiana was \$66,288, considerably higher than the FPL, and average household costs for a single adult were also substantially higher. Cost increases in the Household Survival Budget were driven largely by housing and food.

| Monthly Total | | \$2,230 | \$5,524 |

To see the Household Survival Budget for other household compositions at the state and parish levels, go to UnitedForALICE.org/Household-Budgets/Louisiana.

ALICE IN LOUISIANA: EXECUTIVE SUMMARY

The number of households in financial hardship in Louisiana continues to be undercounted in official measures. According to the FPL, 19% of households in Louisiana (339,916) were in poverty in 2021. Yet [United For ALICE](#) data shows that another 32% (562,552 households) were **ALICE** (Asset Limited, Income Constrained, Employed). ALICE households earn above the FPL, but not enough to afford the basics in the communities where they live.

The reality is that of the 1,776,260 households in Louisiana, **902,468 – 51%** – had income below the [ALICE Threshold of Financial Survival](#) in 2021, the second-highest rate in the U.S. These included both households in poverty and ALICE households.

The crux of the problem is a mismatch between earnings and the cost of basics. For example, 61% of cashiers (one of the most common occupations in Louisiana) were below the ALICE Threshold in 2021. These workers earned a median hourly wage of \$9.86 – not even enough to cover the **ALICE Household Survival Budget** for one worker employed full time (\$13.38 per hour), much less for a family with children, even with two adults working (combined wage of \$33.14 per hour). From 2019 to 2021, the cost of basics increased across Louisiana and remained well above the FPL. For a family of four in 2021, the FPL was \$26,500 while the ALICE Household Survival Budget was \$66,288. Between 2019 and 2021, the average annual costs (excluding taxes) increased 11% for a single adult, 10% for a single senior, and 11% for a family of four. Temporary expansion of tax credits – most notably the Child Tax Credit (CTC) and Child and Dependent Care Tax Credit (CDCTC) – helped to mitigate costs for families with children.

| ALICE Household Survival Budget, Louisiana Average, 2021 | | | |
|--|-----------------|-----------------|------------------------|
| | Single Adult | Single Senior | 2 Adults, 2 Child Care |
| Monthly Costs | | | |
| Housing – Rent | \$531 | \$531 | \$619 |
| Housing – Utilities | \$154 | \$154 | \$292 |
| Child Care | - | - | \$1,421 |
| Food | \$405 | \$374 | \$1,104 |
| Transportation | \$363 | \$316 | \$839 |
| Health Care | \$232 | \$534 | \$893 |
| Technology | \$75 | \$75 | \$110 |
| Miscellaneous | \$176 | \$198 | \$528 |
| Tax Before Credits | \$294 | \$350 | \$1,051 |
| Monthly Total | \$2,230 | \$2,532 | \$6,857 |
| ANNUAL TOTAL Before Credits | \$26,760 | \$30,384 | \$82,284 |
| Tax Credits (CTC and CDCTC) | | - | (\$15,996) |
| ANNUAL TOTAL with Credits | \$26,760 | \$30,384 | \$66,288 |
| Full-Time Hourly Wage | \$13.38 | \$15.19 | \$33.14 |

Note: Percent change is pre-tax. Full-time hourly wage represents the wage needed at 40 hours per week to support the annual total, with credits. For the family of four, this represents the combined wage needed for two workers. For child care, the preschool cost is used for both children in child care. Many households incur higher costs, especially for housing, as units may not be available at Fair Market Rent. To view ALICE Household Survival Budgets for all parishes and for any household composition, visit UnitedForALICE.org/Household-Budgets/Louisiana

This Report details the impact of competing economic forces and public policy interventions during the pandemic — job disruption, inflation, natural disasters, wage increases, and pandemic assistance — on ALICE households in Louisiana in 2021. It also presents research showing that the impact of the pandemic on financial security continued beyond 2021.

Key findings include:

- **Financial hardship over time:** ALICE households are especially vulnerable to national economic disruptions. The number of ALICE households in Louisiana increased substantially through the Great Recession (2007–2010) and continued to rise through 2018, never returning to pre-Recession levels. Between 2018 and 2019, that number had just started to fall — and then the pandemic hit. From 2019 to 2021, the number of ALICE households increased again, as did the number of households in poverty. Together, the number of households below the ALICE Threshold increased by 3%, while the total number of households in the state increased by 2%. However, with a slight increase in households above the Threshold during the same period, the share of households below the Threshold remained flat, at 51%.
- **Demographics:** There are households below the ALICE Threshold across all demographic groups. However, disparities exist in the rates of financial hardship due to [persistent racism](#), [ageism](#), [gender discrimination](#), and geographic [barriers](#) that limit many families' access to resources and opportunities for financial stability. For example, by race/ethnicity, White households were the largest group below the Threshold (450,297) in 2021, making up 42% of all White households in Louisiana. Yet by percentage, rates were higher for other groups: 52% (40,639) of Hispanic households, 52% (26,185) of households of Two or More Races, and 68% (365,242) of Black households were below the Threshold in 2021.
- **Work and wages:** Of the 20 most common occupations in Louisiana in 2021, 75% paid less than \$20 per hour. Most of these saw an increase in the median wage; for example, the median wage for cooks increased by 5% to \$11.13 per hour in 2021. But given that wages had stagnated for the previous decade, many top jobs still had a substantial percentage of workers who lived below the ALICE Threshold.
- **Pandemic assistance:** Public assistance programs were temporarily expanded in 2021, but not enough to bring most households below the ALICE Threshold to financial stability. In Louisiana, a family of four with two parents working full time in two of the most common occupations (retail salesperson and cashier) could not afford the Household Survival Budget in 2021, even with the expanded Child Tax Credit, the Child and Dependent Care Tax Credit, and the Economic Impact Payments.
- **Savings and assets:** According to the Survey of Household Economics and Decisionmaking (SHED), only 37% of households below the ALICE Threshold had emergency savings or rainy day funds in October 2019, compared to 70% of households above the Threshold. By November 2021, the rate for households below the Threshold had decreased (to 29%), while the rate for households above the Threshold had increased (to 73%). There was also a gap in retirement assets: 35% of households below the Threshold had retirement assets in 2021, compared to 62% of those above the Threshold.
- **Beyond 2021:** With pandemic assistance waning while significant challenges remain, there are warning signs that the economic situation for households below the ALICE Threshold has worsened since 2021, including sustained high levels of food insufficiency, continued difficulty paying bills, reduced savings, medical debt, and feelings of anxiety and depression.

THE COMPETING FORCES OF THE COVID ECONOMY

Competing forces have made it difficult to predict the net impact of the COVID-19 pandemic on financial stability. When the pandemic hit, businesses, child care providers, schools, and community services closed, some permanently. The [loss of jobs and wages was not experienced equally](#); those who could work remotely fared better than those who were required to be on-site. Initially, costs for many basics declined, but disruptions to the [supply chain and higher wages](#) to retain workers then [pushed prices up](#) – by 7.5% annually across the U.S. in 2021, compared to less than 3% annually in the [prior 10 years](#) – straining ALICE households even more. And in the midst of the pandemic, Louisianians experienced [six additional major disasters](#) in 2020 and 2021, including Hurricanes [Laura](#), [Delta](#), and [Ida](#), with devastating impacts to coastal communities and rippling economic impacts across the state.

Yet other forces provided economic benefits. In 2021, [average weekly wages](#) across all industries were up 3.6% in Louisiana from 2020, and up 5.6% nationally (the second-fastest national increase in the past two decades). In addition, [emergency pandemic measures](#) and [economic policies](#) provided critical support for ALICE

families. Those measures made a difference, helping to substantially mitigate, but not prevent, the economic impact of the pandemic.

Rates of financial hardship in Louisiana have shifted over time (Figure 2). During the last major economic disruption – the Great Recession – the percentage of Louisiana households below the ALICE Threshold increased from 41% in 2007 to 46% in 2010. In the decade that followed, the number of ALICE households continued to rise. The number of households in poverty also rose until 2016, when it began to trend downward.

Between 2018 and 2019, the number of ALICE households had just started to decrease – and then the pandemic hit. From 2019 to 2021, the number of ALICE households and households in poverty grew from 879,488 to 902,468, an increase of 3%. However, compared to the Great Recession, the impact of the pandemic on financial hardship was more muted. While the number of households below the Threshold grew from 2019 to 2021, the share of Louisiana households below the Threshold remained flat, at 51% – the second-highest rate in the U.S. in 2021.

Figure 2. Households by Income, Louisiana, 2007–2021

Sources: ALICE Threshold, 2007–2021; U.S. Census Bureau, American Community Survey, 2007–2021

THE IMPACT OF THE COVID ECONOMY ON... ALICE DEMOGRAPHICS AND EQUITY

While the overall number of Louisiana households that were struggling financially increased from 2019 to 2021, the impact of competing forces played out differently across demographic groups (Figure 3). In many cases, the pandemic exposed and exacerbated disparities and vulnerabilities that have long existed in our society, with substantial differences in rates of hardship by race/ethnicity, age, and household composition.

In Louisiana in 2021, Black households, young households, and single-parent households had the highest rates below the ALICE Threshold. White households, working-age households, and married-parent households had the lowest rates below the Threshold.

Rates of financial hardship differed substantially across demographic groups, a result of multiple factors including [persistent racism](#), [ageism](#), [gender discrimination](#), and geographic [barriers](#) that limit many families' access to resources and opportunities for financial stability:

- In 2021, White households made up the largest group below the Threshold (450,297), accounting for 42% of all White households in Louisiana. Yet by percentage, rates were higher for other groups. For example, 52% (40,639) of Hispanic households, 52% (26,185) of households of Two or More Races, and 68% (365,242) of Black households were below the Threshold in 2021.

- By age of householder, the youngest and the oldest households had the highest rates of hardship, with 78% of households headed by someone under age 25 and 59% of senior households (age 65+) living below the Threshold in Louisiana. By comparison, 48% of households headed by people age 25–44 and 44% of households headed by those age 45–64 were below the Threshold.
- By household composition, single parents were most likely to be below the ALICE Threshold, with 57% of single-male-headed households and 86% of single-female-headed households struggling to make ends meet. Rates of financial hardship were lower for married-parent households (21%) and single/cohabiting households without children (50%).
- Households in predominantly rural parishes had a higher rate of financial hardship than households in predominantly urban parishes (59% vs. 49%)

Figure 3 paints a clear picture of the rates of hardship for different demographic groups compared to the Louisiana average. For all households in the state, 19% were in poverty and 32% were ALICE in 2021.

Figure 3. Household Financial Status and Key Demographics, Louisiana, 2021

| | Total | Below ALICE Threshold | ■ Poverty ■ ALICE ■ Above ALICE Theshold | | |
|--|-----------|-----------------------|---|-----|-----|
| ALL HOUSEHOLDS | 1,776,260 | 902,468 | 19% | 32% | 49% |
| AGE | | | | | |
| Under 25 Years | 69,369 | 54,423 | 42% | 37% | 22% |
| 25 to 44 Years | 591,262 | 283,437 | 21% | 27% | 52% |
| 45 to 64 Years | 635,080 | 282,468 | 17% | 28% | 56% |
| Seniors (65+) | 480,549 | 282,140 | 16% | 42% | 41% |
| RACE/ETHNICITY | | | | | |
| American Indian/ Alaska Native | 9,262 | 4,611 | 15% | 35% | 50% |
| Asian | 25,698 | 10,094 | 11% | 28% | 61% |
| Black | 536,590 | 365,242 | 24% | 44% | 32% |
| Hispanic | 78,041 | 40,639 | 13% | 39% | 48% |
| Native Hawaiian/ Pacific Islander | 657 | 284 | 12% | 31% | 57% |
| Two or More Races | 50,228 | 26,185 | 16% | 37% | 48% |
| White | 1,071,534 | 450,297 | 10% | 32% | 58% |
| HOUSEHOLD TYPE | | | | | |
| Married With Children | 278,918 | 59,640 | 9% | 13% | 79% |
| Single-Female- Headed With Children | 147,950 | 127,085 | 56% | 30% | 14% |
| Single-Male-Headed With Children | 44,751 | 25,636 | 28% | 29% | 43% |
| Single or Cohabiting, Under 65, no Children | 824,092 | 407,967 | 17% | 32% | 50% |
| URBAN/RURAL | | | | | |
| Rural | 269,580 | 160,179 | 24% | 35% | 41% |
| Urban | 1,506,680 | 742,289 | 18% | 31% | 51% |

Note: The groups shown in this figure overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Report, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below \$15,000 is used as a proxy. Parishes are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Parishes with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

Sources: ALICE Threshold, 2019 and 2021; American Community Survey, 2019 and 2021

Changes in Population and Financial Hardship (2019–2021)

In the decade preceding the pandemic, population growth in the U.S. had started to slow due to a decrease in the number of births and international migration, and an increase in deaths associated with the aging population. The pandemic [exacerbated the national slowdown](#), and in 2021 population growth in the U.S. reached a [historic low](#) due to a sharp increase in COVID-related deaths, postponement of having children, and more restrictive policies on immigration.

The pandemic also affected domestic migration, which contributed to population shifts nationally and in Louisiana. Between 2020 and 2021, the percentage of the [population that moved](#) from one residence to another within the U.S. dropped from 9.3% to 8.4%. People moved for a [variety of reasons](#), which included relocating to places where the cost of living was lower (especially for [housing](#) and [taxes](#)), and/or to [less densely populated locations](#).

In Louisiana, the pandemic and concurrent natural disasters also impacted where people lived, who they lived with, and the demographics of households. Overall, total households in the state grew from 1,738,124 in 2019 to 1,776,260 in 2021 (a 2% change).

Location: In Louisiana from 2019 to 2021, the largest parishes in the state (in terms of total households) experienced an increase in total households — Lafayette Parish up 4%, Jefferson and Orleans parishes each up 5%, and East Baton Rouge and St. Tammany parishes each up 9%. All of these parishes also had an increase in the

number of households below the ALICE Threshold, with the largest increase in East Baton Rouge Parish (up 18%). Also, as [the most flood-prone state in the U.S.](#), Louisiana has been experiencing migratory shifts as a result of flood risk and impacts, with the [lowest-lying communities losing population](#) over the last decade. (See additional parish-level data [on the ALICE website](#) and in the “Parish Comparison” section of this Report.)

Overall, the number of households in predominantly rural parishes decreased across Louisiana, while the number of households in predominantly urban parishes increased. Households in predominantly rural parishes had a higher rate of financial hardship than households in predominantly urban parishes (59% vs. 49%) in 2021.

Age: Between 2019 and 2021, households headed by seniors (age 65+) had the largest increase in the rate of financial hardship, rising from 56% to 59%. The percentage of households below the Threshold also increased for households headed by people age 25–44 (from 47% to 48%), and stayed the same for those headed by people under age 25 (although the number of these households below the Threshold increased, by 13%). In contrast, the number and percentage of households below the Threshold headed by someone age 45–64 decreased during the same period, from 47% to 44%.

Household composition: There was relatively little change in financial hardship by household composition in Louisiana between 2019 and 2021. The percentage of households below the ALICE Threshold remained the same for married-parent households with children (at 21%), single or cohabiting households without children (at 50%), and single-female-headed households with children (at a notably high 86%). For single-male-headed households with children, the rate decreased from 62% to 57%, although the number of these households below the Threshold remained flat.

URBAN AND RURAL CHANGE IN LOUISIANA (2019–2021)

- 4% decrease in total number of households in rural parishes
- 3% increase in total number of households in urban parishes

Race/ethnicity: This Report is not able to accurately capture change over time by race/ethnicity in the total number or share of households below the ALICE Threshold. Starting in 2020, the U.S. Census Bureau changed how it asks about and codes [data on race and Hispanic origin](#). These changes help the Census and ACS provide a more complete picture of the U.S. population, especially for people who self-identify as multiracial or multiethnic. But as a result, the [Census urges caution](#) when comparing race data between years before and after 2020. For example, in Louisiana, the huge increase in the Census count of people of [Two or More Races](#) (also referred to now as Multiracial) – an increase of 133% from 2019 to 2021 – is a combination of actual growth in this population and improvements to Census questions and coding. (Note: The number of Multiracial households below the ALICE Threshold increased at almost the same rate, by 123%).

Immigration: The pandemic not only imposed new barriers to international migration but also had a significant impact on immigrant communities across the U.S. According to the [Migration Policy Institute](#), as a result of immigration center processing delays and bans on international travel, the number of visas issued in the U.S. dropped by half between 2019 and 2020. In Louisiana in 2021, 4% of the population were immigrants, the same as in 2019, with the largest number of immigrants originating from Honduras, Mexico, and Vietnam. The parishes with the largest number of immigrants included East Baton Rouge, Jefferson, and Orleans.

- The labor landscape in Louisiana

THE IMPACT OF THE COVID ECONOMY ON... WORK AND WAGES

Overall, in 2021, the labor market was rebounding from the record-breaking unemployment and [drop in total employment](#) that occurred at the start of the pandemic. The unemployment rate was 5.4% in Louisiana in 2021, a stark contrast to unemployment at the start of the pandemic (13.5% in April 2020). In addition, [average weekly wages](#) across all industries increased 3.6% in Louisiana from 2020 to 2021. This was driven by increased demand for [essential workers](#), as well as by "The Great Resignation" — while some workers left the labor force, over time many more changed jobs to find better pay as well as work-life balance.

It was also a unique year for low-wage jobs and workers. In 2021, low-wage workers across the country experienced [faster wage growth than middle- and high-wage workers](#), although from a much lower starting point. Research from [Opportunity Insights](#) shows that the number of low-wage jobs fell in Louisiana: In December 2021, there were 19.5% fewer jobs paying less than \$29,000 per year than at the start of the pandemic — some became higher-paying jobs, others went away altogether.

[State Unemployment Insurance](#) (UI) helps individuals who lost jobs — before, during, and after the pandemic. In 2021, \$309 million was paid to individuals under Louisiana's regular unemployment insurance program, and an additional \$3.2 million was paid in Extended Unemployment Benefits, available during periods of specified high unemployment.

During the pandemic, these standard UI benefits were expanded by the [Cares Act, the American Rescue Plan, and the Continued Assistance Act](#), which included [four temporary programs](#). The most utilized was the Federal Pandemic Unemployment Compensation (FPUC) program, which provided a \$300 weekly supplement to all UI benefits (down from the \$600 weekly supplement included in the original 2020 authorization). Additional programs extended the weeks of eligibility for people who exhausted regular UI benefits, and expanded eligibility to people who were not otherwise eligible for UI benefits (including workers who were self-employed, independent contractors, or gig economy workers). Nationally, these temporary UI measures enacted in response to the COVID-19 pandemic ended in September 2021; however, Louisiana [opted out](#) of these programs in July 2021.

For low-wage workers, the increases in wages and UI benefits were important developments during the pandemic. But they are only part of the story; ALICE workers still faced significant challenges:

- Louisiana experienced a [substantial number of natural disasters](#) during the pandemic. When natural disasters hit, businesses close, leaving workers with gaps in income. For small businesses, these closures are more likely to be permanent, and industries reliant on natural resources — like fishing and shrimping businesses — are at [increased risk of closure and loss of income](#). In 2021, federal disaster assistance included [over \\$816 million in U.S. Small Business Administration loans](#) to repair, rebuild,

THE ALICE ECONOMIC VIABILITY DASHBOARD — COMING FALL 2023

The Economic Viability Dashboard (EVD) will provide key data on the local economic conditions that matter most to ALICE households: Housing Affordability, Job Opportunities, and Community Resources. The EVD mapping, profile, and comparison features will help stakeholders identify the gaps that ALICE workers and families face in reaching financial stability. Then, the Action Toolkit puts that data to use by quantifying gaps and pairing them with promising solutions.

and replace damaged property as a result of natural disasters across the state.

- Better pay and work opportunities were helpful, but not enough to recoup years of being squeezed by the increasing cost of basics, especially for those who struggled to secure full-time employment. As documented in the [ALICE Essentials Index](#), the cost of essential goods had already been outpacing wages for more than a decade, stretching ALICE workers' household income even further.
- Many frontline and essential jobs became [hazardous and difficult](#) during the pandemic. In addition to increased exposure to COVID-19, many workers were required to work more days and hours, skip lunch and breaks, stand for hours, and work while sick. Others were [gig workers](#), forced to work more hours to fill income gaps. Without protective gear, health insurance, or even sick days, there were [increases in mortality](#) compared with previous years, especially for food- and agriculture-sector workers.
- Underemployment was a problem. Many workers were unable to work full time due to family responsibilities, being in school or training, illness, disability, or child care problems. Others were working part time because their hours had been reduced; still others were unable to find full-time jobs. In 2021 in Louisiana the [underemployment rate](#) that captures these workers was 9%, higher than the traditional unemployment rate (5.4%), and slightly higher than before the pandemic (8.6% in 2019).
- Many older workers were also forced to [retire earlier than planned](#). Nationally, according to SHED in November 2021, 25% of adults who retired within the year prior to the survey, and 15% of those who reported that they retired one to two years earlier, said factors related to COVID-19 contributed to when they retired.
- Nationally, those most impacted by [unemployment, job disruption](#), and hazardous and difficult working conditions were [immigrants](#) and workers who were American Indian/Alaska Native, Black, Hispanic, Native Hawaiian/Pacific Islander, or of Two or More Races.

Wages for the Most Common Occupations

In 2021, the impact of the pandemic on workers' wages and wage gains did not translate uniformly across all jobs and sectors in terms of the share of households that were still left below the ALICE Threshold.

Of the 20 most common occupations in Louisiana in 2021, 75% paid less than \$20 per hour. Most of these saw an increase in the median wage; for example, the median wage for cooks increased by 5% to \$11.13 per hour in 2021. But given that wages had stagnated for the previous decade, many top jobs still had a substantial percentage of workers who lived below the ALICE Threshold in 2021 (Figure 4). The wage to cover the ALICE Household Survival Budget for one full-time worker was \$13.38 per hour, or for a family with two adults and two children, a combined wage of \$33.14 per hour.

While there were ALICE workers in all sectors, the occupations with the highest percentage of workers below the ALICE Threshold in Louisiana in 2021 included personal care aide; cashier; cook; fast food/counter worker; and food preparation worker.

CHILD CARE WORKERS

The pandemic brought to the forefront the crisis in child care availability and cost. For families with two children in care, child care is often the most expensive item in their budget, even more expensive than housing. Child care workers are the workforce behind the workforce, yet many struggle to make ends meet for their own families: With a median hourly wage of \$9.17 in Louisiana in 2021, 49% were below the ALICE Threshold. And with staffing and demand fluctuations, many child care providers went out of business during the pandemic. Lack of care remains an [obstacle for working parents](#).

Figure 4. Top Occupations, Employment, Wages, and Percentage Below ALICE Threshold, Louisiana, 2021

| Occupation | Total Employment (BLS) | Median Hourly Wage (BLS) | Percent Median Wage Change From 2019 (BLS) | Percent Workers Below ALICE Threshold (ACS PUMS) |
|--|-------------------------------|---------------------------------|---|---|
| Cashiers | 59,880 | \$9.86 | 6% | 61% |
| Retail Salespersons | 50,620 | \$11.19 | 3% | 37% |
| Driver/Sales Workers and Truck Drivers | 43,300 | \$18.83 | 12% | 34% |
| Registered Nurses | 42,870 | \$30.99 | 1% | 6% |
| Laborers and Movers, Hand | 36,150 | \$13.87 | 9% | 42% |
| Personal Care Aides | 35,520 | \$8.75 | -3% | 74% |
| General and Operations Managers | 34,670 | \$46.88 | 1% | 8% |
| Secretaries and Administrative Assistants | 32,220 | \$16.73 | 12% | 24% |
| Office Clerks | 30,850 | \$13.47 | 16% | 33% |
| Cooks | 30,310 | \$11.13 | 5% | 58% |
| Waiters and Waitresses | 29,510 | \$8.78 | 0% | 51% |
| Food Preparation Workers | 29,010 | \$9.13 | 2% | 56% |
| Elementary and Middle School Teachers | 27,410 | \$23.40 | 1% | 23% |
| Fast Food and Counter Workers | 24,850 | \$8.94 | -1% | 58% |
| Customer Service Representatives | 24,190 | \$14.34 | -3% | 44% |
| Stockers and Order Fillers | 24,020 | \$13.58 | 19% | 50% |
| Sales Representatives, Wholesale and Manufacturing | 21,730 | \$30.13 | 14% | 24% |
| Administrative Support Supervisors | 21,330 | \$23.12 | 4% | 19% |
| Bookkeeping, Accounting, and Auditing Clerks | 20,400 | \$18.27 | 3% | 21% |
| Retail Sales Supervisors | 19,110 | \$17.80 | 2% | 33% |

THE IMPACT OF THE COVID ECONOMY ON... PANDEMIC ASSISTANCE

A prominent feature of the federal government’s response to the pandemic was a range of direct assistance programs, including:

- Economic Impact Payments (stimulus payments)
- The expanded Child Tax Credit (CTC) and Child and Dependent Care Tax Credit (CDCTC)
- Pandemic-specific unemployment insurance
- Emergency rental assistance

While ALICE households generally earn too much to qualify for traditional forms of public assistance like the Supplemental Nutrition Assistance Program (SNAP) or Temporary Assistance for Needy Families (TANF), almost all ALICE households qualified for the Economic Impact Payments, and ALICE families with children were eligible for the expanded CTC and CDCTC.

Figure 5 shows an example of the impact of pandemic assistance on a household’s ability to meet the cost of basics in 2021. The figure shows a family of four in Louisiana with two parents working full time in two of the most common occupations, retail salesperson and cashier (median wages of \$11.19 and \$9.86 per hour, respectively). This family could not afford the Household Survival Budget in 2021, even with the temporarily increased credits and payments available to them: the CTC (\$3,600 for each child under age 6), the CDCTC (\$4,000 per child in child care), and the Economic Impact Payments (\$2,800 for married couples plus \$1,400 for each child), for a total of \$64,576. With both parents working full time, they were not eligible for [Treasury Emergency Rental Assistance](#) (ERA). This family’s annual income fell short of the Household Survival Budget by \$17,708, or 27%.

If both parents worked part time (20 hours per week), they could receive ERA to cover their rent, as well as [SNAP](#) and the [Earned Income Tax Credit](#) (EITC, also [temporarily expanded](#) in 2021), but they would still fall short in meeting the Survival Budget by \$18,524, or 29%.

Additional actions taken by the state of Louisiana in response to the pandemic can be found in the National Conference of State Legislatures’ [State Action on Coronavirus Database](#).

Pandemic Timeline

2020 State Annual [COVID-19 Deaths](#): 7,448

March 2020 – [National Emergency Declared](#)

Emergency Pandemic Unemployment Insurance (UI) benefits (including [PUA](#), [PEUC](#), [FPUC](#), and [MEUC](#))

States required to keep [Medicaid beneficiaries enrolled](#)

April 2020 – [Economic Impact Payments](#) of up to \$1,200 per adult for eligible individuals and \$500 per qualifying child

December 2020 – First [COVID-19 vaccinations](#) receive emergency use authorization from FDA

[Economic Impact Payments](#) of up to \$600 per adult for eligible individuals and up to \$600 per qualifying child

2021 State Annual [COVID-19 Deaths](#): 7,533

January to November 2021 – [Emergency rental assistance](#) provided on average \$4,345 to low-income households to pay rent or utility bills

March 2021 – [Economic Impact Payments](#) of up to \$1,400 for eligible individuals

July to December 2021 – [Child Tax Credit payments](#) (up to \$300 month per child); temporary [expansion of CTC ended nationally](#) in December

September 2021 – National end of all [Emergency Pandemic UI benefits](#)

October 2021 – End of CDC’s [eviction moratorium](#)
CDC approves vaccinations for [children age 5-11](#)

2022 State Annual [COVID-19 Deaths](#): 3,389

June 2022 – CDC approves vaccinations for [children under 5 years old](#)

Sources: ALICE Threshold, 2021; Bureau of Labor Statistics—Occupational Employment Statistics, 2021; Internal Revenue Service, tax credits – CTC, CDCTC, EITC, 2021; USDA, SNAP, 2021; U.S. Treasury, 2022

Participation in Assistance Programs

Traditional public assistance does not reach all people in households that are struggling financially. Due to [income and assets limits](#), most ALICE households are not able to participate in public assistance; and additional barriers, strict [program requirements](#), and [stigma](#) prevent even households in poverty from participating. In addition, income and asset limits for public assistance can create “[benefits cliffs](#)” that limit economic mobility. In Louisiana in 2021:

- With increased food insecurity during the pandemic, the federal [SNAP](#) provided an [emergency allotments option](#) starting in 2020, increasing the amount of SNAP by about \$90 per month per household. Because the income eligibility threshold for SNAP was 130% of the FPL in Louisiana, the reach of emergency and regular SNAP benefits was limited: 48% of households in poverty and 22% of ALICE households participated in 2021, based on ACS PUMS data. However, it is important to note that while not all financially insecure households are eligible for SNAP, the program reached [over 80% of eligible households](#) in Louisiana.
- The percentage of households below the ALICE Threshold receiving direct cash assistance from programs like [TANF](#) was even smaller (3% of households in poverty and 2% of ALICE households).
- Participation in [SSI](#) – an assistance program only available for people with disabilities and seniors with limited financial resources – was also minimal, with 12% of all households below the ALICE Threshold and 21% of households with a member with a disability below the Threshold participating.
- [Medicaid expansion](#) in Louisiana helped to [keep the uninsured rate relatively low during the pandemic](#), especially compared to non-expansion neighboring states, like Mississippi and Texas. In addition, the federal government provided additional Medicare funding and prohibited states from adding eligibility restrictions or terminating [Medicaid coverage](#) during

the public health emergency. In 2021, 57% of all households below the ALICE Threshold in Louisiana participated in CHIP or Medicaid.

- Paying for housing expenses was the top concern of households below the ALICE Threshold, as reported in the 2021 ALICE Report, [The Pandemic Divide](#). The federal [Emergency Rental Assistance Program](#) was critical in stabilizing millions of households by paying for rent, utilities, and home energy costs. Yet because of the strict requirements to qualify, many households struggling to afford rent were not eligible. Requirements included qualifying for unemployment benefits, experiencing a reduction in income, and one or more household members being at risk of homelessness. In the fall of 2022, 14% of adult renters in Louisiana were not caught up on rent, according to the Household Pulse Survey.

In contrast, eligibility limits for the well-publicized stimulus payments (Economic Impact Payments, CTC, and CDCTC) were well above those for traditional public assistance programs, making them available to most poverty-level and ALICE households. However, even qualified households [experienced difficulties](#) getting their payments, especially those who were filing taxes for the first time, those without bank accounts or internet access, and families with mixed immigrant status or who were experiencing homelessness.

Disaster relief programs are also available to a broader range of income levels and are a vital lifeline, especially for households without adequate insurance. In 2021, Louisiana received [over \\$2 billion in federal disaster assistance](#), including more than \$899 million in financial aid and direct services to those whose disaster recovery needs were not met through insurance, as well as housing assistance for more than 179,000 households. In addition, during declared disasters, states can apply for [D-SNAP](#) to expand program eligibility and broaden covered purchases to include things like hot/prepared foods. For example, following Hurricane Ida, [D-SNAP was in effect across 25 parishes](#).

THE IMPACT OF THE COVID ECONOMY ON... SAVINGS AND ASSETS

It has been widely reported that U.S. household [savings increased](#) during the pandemic. Yet analysis of the data from the [Federal Reserve SHED](#) reveals that the national average conceals different experiences by state and even more so by income level in terms of rainy day funds and retirement assets.

Rainy Day Funds

One of the best-known questions in the SHED survey asks whether respondents had set aside emergency savings or “rainy day” funds that would cover their expenses for three months in case of sickness, job loss, economic downturn, or other emergencies. In October 2019, 55% of

Louisiana respondents reported having these funds; by November 2020, that share had increased to 56%, before dropping to 53% in November 2021 (Figure 6).

Yet only 37% of respondents below the Threshold in Louisiana reported having rainy day funds in October 2019, with the percentage increasing to 42% by November 2020, then dropping substantially to 29% by November 2021. In contrast, 70% of those above the Threshold in Louisiana had rainy day funds in October 2019, and that share increased to 71% in November 2020 and 73% in November 2021. (These rates only speak to whether households report having these savings, not to the specific amount of savings.)

Figure 6. Funds to Cover Three Months’ Expenses by the ALICE Threshold, Louisiana, 2021

Question: Have you set aside emergency or rainy day funds that would cover your expenses for three months in the case of sickness, job loss, economic downturn, or other emergencies?

Sources: ALICE Threshold, 2021; Federal Reserve Board, Survey of Household Economics and Decisionmaking (SHED), November 2021

Nationally, there were also substantial gaps by income and race/ethnicity in rainy day funds (this data is not available at the state level, but it is likely these disparities were mirrored in Louisiana). In 2021, White and Hispanic respondents below the ALICE Threshold had higher rates of emergency savings (42% and 41%, respectively) than Black respondents below the Threshold (32%). Rates were higher overall for respondents above the Threshold, yet gaps remained (77% for White, 71% for Hispanic, and 64% for Black respondents). Each of these racial/ethnic groups made gains during the pandemic, with Hispanic respondents both above and below the Threshold showing the largest increase in emergency savings. From October 2019 to November 2021, the percentage of Hispanic respondents below the Threshold with rainy day funds increased from 28% to 41%, and the percentage of Hispanic respondents above the Threshold with these funds increased from 57% to 71%.

Retirement Assets

[Retirement assets](#) include 401(k)s, IRAs, pensions, or business or real estate holdings that provide income

in retirement. Overall, 61% of Louisiana respondents reported having these funds in October 2019; that rate dropped to 49% in November 2020, and remained relatively flat through November 2021 (at 50%). Yet these averages conceal substantial differences in retirement assets between households above and below the ALICE Threshold in Louisiana (Figure 7).

Prior to the pandemic, in October 2019, 45% of respondents below the Threshold in Louisiana had retirement assets, according to SHED. That rate dropped to 35% by November 2021. In October 2019, 74% of respondents above the Threshold in Louisiana had retirement assets; that rate dropped to 62% by November 2021.

The [CARES Act](#) reduced penalties for early withdrawals from retirement accounts, thus making it easier for households to access retirement funds. Nationally, 8% of non-retired adults tapped into their retirement savings in 2021, according to SHED. And according to a [national retirement survey](#), the majority of loans or hardship withdrawals in 2022 were taken by low-income households.

Figure 7. Retirement Assets by the ALICE Threshold, Louisiana, 2021

Question: Do you currently have each of the following types of retirement savings? Selected at least one: 401(k); IRA; pension; savings outside a retirement account, business, or real estate holding that will provide income in retirement; other retirement savings

Sources: ALICE Threshold, 2021; Federal Reserve Board, Survey of Household Economics and Decisionmaking (SHED), November 2021

BEYOND 2021: ECONOMIC CHALLENGES AHEAD FOR ALICE

The pandemic timeline shows a contracting economy in 2020 followed by a strong policy response in 2021. The government’s broad [pandemic response was effective](#) in preventing the kind of surge in financial hardship that was experienced during the Great Recession.

But 51% of households were still living below the ALICE Threshold in Louisiana in 2021. With COVID-19 continuing but pandemic relief benefits expiring, [initial data from 2022](#) suggests that the economic situation has in fact gotten worse for ALICE, which in turn puts the wider economy at risk.

An analysis of recent surveys reveals that households below the ALICE Threshold are still facing food insufficiency, difficulty paying bills, medical debt, reduced savings, and feelings of anxiety and depression. These challenges were first reported in [The Pandemic Divide](#), and they are updated here with the most recent data from SHED (through November 2021) and the Household Pulse Survey (through December 2022).

These surveys also provide an alarming look at the breakdown of pandemic experiences by race, sex, sexual

orientation and gender identity, and disability status. The differences here are even starker than when looking at income alone, giving credence to concerns that the pandemic is exacerbating racial and other inequities across all facets of life.

Warning signs:

! Food insufficiency: ALICE families experiencing food insufficiency are a canary in the coal mine, indicating larger problems beyond food. Rates of food insufficiency have [remained elevated](#) since the beginning of the pandemic. In the August 2020 Household Pulse Survey, 18% of respondents below the ALICE Threshold in Louisiana reported that their household sometimes or often did not have enough food in the prior seven days (compared to 4% of respondents above the Threshold); by November 2022, the rate was higher, at 26% (compared to 5% for those above the Threshold). Some demographic groups experienced higher than average food insufficiency (Figure 8). For example, 24% of Black respondents below the Threshold and 36% of

Figure 8. Food Insufficiency, Above and Below the ALICE Threshold, Louisiana, 2022

| Food Insufficiency | | | |
|--------------------|-----------------------|-----------------------|---------------|
| | Below ALICE Threshold | Above ALICE Threshold | State Average |
| Black | 24% | 2% | 15% |
| Female | 23% | 5% | |
| With a Disability | 36% | 10% | |
| LGBT | 24% | 2% | |

Question: In the last seven days, which of these statements best describes the food eaten in your household? Selected: Sometimes or often not enough

Note: Black respondents are non-Hispanic; the “With a Disability” group includes respondents who have one or more vision, hearing, cognitive, mobility, or self-care difficulties; the “LGBT” group includes respondents who identify as gay or lesbian, bisexual, and/or transgender. The number of Hispanic respondents was too small to include in this analysis.

Sources: ALICE Threshold, 2021; U.S. Census Bureau, Household Pulse Survey, September 14, 2022–November 14, 2022, Phase 3.6

respondents with disabilities below the Threshold reported not having enough food, compared to 15% of all Louisiana households.

For households with children below the ALICE Threshold in Louisiana, rates of food insecurity continued to increase. In August 2020, 17% of these households reported that often or sometimes their children were not eating enough because they couldn't afford enough food; by November 2022 that rate had risen sharply, to 30%. In contrast, the rate for households with children above the Threshold decreased from 12% to 8% during the same period.

With changes to the emergency pandemic food measures, including the [ending of SNAP emergency allotments](#), many families will need to rely on the charitable food system that was designed for emergencies, but is increasingly [an ongoing necessity](#).

! Learning loss: Following a year of widespread school closings and disrupted education, most students returned to in-person learning in the fall of 2021. The [learning loss](#) that accompanied remote learning has been widely reported. Not surprisingly, students in lower-income districts with fewer resources were hardest hit. Nationally, in 2021, 71% of parents below the Threshold said that their child was prepared for the academic year ahead, compared to 81% of parents above the Threshold. The [National Center for Education Statistics](#) (NCES) reported that nationally in 2022, scores for 9-year-old students declined five points in reading and seven points in mathematics compared to 2020 – the largest average score decline in reading since 1990, and the first-ever score decline in mathematics. Drops were even larger for low-income students as well as for Black and Hispanic students.

! Behind on rent payments: According to the Household Pulse Survey, renter households below the ALICE Threshold in Louisiana were more likely than those above the Threshold to report that they were not caught up on rent payments, although

rates improved between 2020 and 2022. In August 2020, 28% of renters below the Threshold and 14% of renters above the Threshold were not caught up; by November 2022, those rates had decreased to 17% for renters below the Threshold and 5% for those above. Renters who fall behind on rent are at greater risk for eviction, especially since the federal moratorium on [evictions and foreclosures](#) and [state-level bans](#) have now expired, and funding for rental assistance is running out. As a result, [eviction filings are on the rise](#) and are likely to [increase in the near term](#).

! Struggling to pay bills: During the height of the pandemic, in August 2020, 55% of households below the ALICE Threshold in Louisiana said it was somewhat or very difficult to pay for usual items such as food, rent or mortgage, car payments, and medical expenses, according to the Household Pulse Survey. That rate increased to 64% by November 2022. Both rates were considerably higher than for respondents above the Threshold (24% in August 2020 and 31% in November 2022).

! Facing lack of savings and medical debt: By the end of 2021, many ALICE families were struggling to save and were facing medical debt, making them more vulnerable to an emergency in the future. Only 29% of respondents to the SHED survey below the ALICE Threshold in Louisiana had set aside emergency savings or rainy day funds that would cover their expenses for three months in the event of sickness, job loss, economic downturn, or another emergency. In addition, 17% of respondents below the Threshold had incurred an unexpected major medical expense that they had to pay for out of pocket because it was not completely paid for by insurance.

! Physical health: A [September 2020 national survey](#) found that 36% of adults (age 18 to 64) delayed or missed health care services, including dental care, primary care, or specialist visits; preventive health screenings; and medical tests. For those with one or more chronic conditions, a mental health condition, or a lower income, the likelihood

of postponing or forgoing care was even higher. Parents also postponed care for their children: In the fall of 2021, Louisiana households below the ALICE Threshold were more likely to report that they missed, delayed, or skipped their [child’s preventive check-up](#) in the last 12 months than households above the Threshold (45% vs. 36%). These delays, especially when coupled with preexisting conditions, can contribute to [more serious conditions in the future](#).

According to the November 2022 Household Pulse Survey, Louisiana respondents below the ALICE Threshold were also slightly more likely to report having symptoms of long COVID (such as fatigue, “brain fog,” difficulty breathing, heart palpitations, dizziness, or changes to taste/smell) lasting three months or longer that they did not have prior to having COVID-19 than respondents above the Threshold (35% vs. 32%).

! **Mental health:** With these sustained challenges, it’s not surprising that people below the ALICE Threshold in Louisiana were more likely to report feeling depressed or anxious than those above

the Threshold. According to the Household Pulse Survey, in August 2020, 20% of respondents below the Threshold and 17% above the Threshold reported feeling nervous, anxious, or on edge nearly every day over the last two weeks. These rates remained relatively flat as of November 2022 (21% and 16%, respectively). Respondents below the Threshold were also more likely to report feeling down, depressed, or hopeless at both timepoints (13% in 2020 and 18% in 2022) than respondents above the Threshold (9% in 2020 and 9% in 2022). Some demographic groups experienced substantially higher rates of feeling anxious than the state average (Figure 9).

The lack of mental health resources during the pandemic has been [widely recognized](#), and awareness is increasing, especially with the launch of the [Nationwide Suicide and Crisis Lifeline](#) (988). But there remains a severe [shortage of mental health resources](#), especially for low-income families, and mental health providers struggle to meet [increased demand](#).

Figure 9. Feeling Anxious, Above and Below the ALICE Threshold, Louisiana, 2022

| Feeling Nervous, Anxious, or on Edge | | | |
|--------------------------------------|-----------------------|-----------------------|---------------|
| | Below ALICE Threshold | Above ALICE Threshold | State Average |
| Black | 16% | 13% | 19% |
| Female | 21% | 19% | |
| With a Disability | 38% | 34% | |
| LGBT | 47% | 25% | |

Question: Over the last two weeks, how often have you been bothered by feeling nervous, anxious, or on edge? Selected: Nearly every day

Note: Black respondents are non-Hispanic; the “With a Disability” group includes respondents who have one or more vision, hearing, cognitive, mobility, or self-care difficulties; the “LGBT” group includes respondents who identify as gay or lesbian, bisexual, and/or transgender. The number of Hispanic respondents was too small to include in this analysis.

Sources: ALICE Threshold, 2021; U.S. Census Bureau, Household Pulse Survey, September 14, 2022–November 14, 2022, Phase 3.6

From Warnings to Reality: ALICE Today

The strength of the Louisiana economy is inextricably tied to the financial stability of all residents. As the pandemic has shown, ALICE workers are critical to the smooth running of the economy, during times of crisis and beyond. And, in turn, the stability of ALICE families depends on their being able to fully participate in that economy. Leaving ALICE behind in the recovery sets households and the larger economy up for greater vulnerability to the next economic disruption.

This is already happening, at the same time that the [frequency and severity of natural disasters continue to increase](#). In places that experienced natural disasters in 2021 and 2022 — such as Hurricane Ian in Florida; wildfires in Idaho, Utah, and California; flooding in

Kentucky and Missouri; and tornadoes in the southern U.S. — ALICE families faced [higher risks](#). In Louisiana this differential impact could be seen following [Hurricane Ida in August 2021](#). According to the Household Pulse Survey (December 2022), respondents below the ALICE Threshold in Louisiana were more likely than households above the Threshold to be displaced from their home (18% vs. 13%). One month after the storm, they were also far more likely to be experiencing a shortage of food (61% vs. 48%).

The pandemic has highlighted the ability of government policymakers and business managers to respond to changing conditions quickly. The 2021 ALICE data may surprise some readers who were expecting much worse. But 2021 was a unique year — and these warning signs are both a call to action and a challenge to complacency. We ignore our essential workers at our economy's and our communities' peril.

PARISH COMPARISON: INCOME STATUS, 2021

The table below shows, for each parish, the total number of households and the percentage of households that are below the ALICE Threshold (% ALICE + Poverty). It also shows (in the grey columns on the right side) the percent change in the number of households and the number of households below the Threshold for each parish. For example, in Acadia Parish between 2019 and 2021, the total number of households decreased by 3% and the total number of households below the Threshold increased by 1%.

| Louisiana Parishes, 2021 | | | Percent Change, 2019–2021 | |

NEXT STEPS

Capturing the true extent of financial hardship in Louisiana is critical for the appropriate allocation of funds for programs in areas such as education, health care, food access, housing, and employment. There is a lot more to be done to change the trajectory for households struggling to make ends meet. How can you help?

Learn more and help to raise awareness of the struggles ALICE households face with:

- The interactive [ALICE in Louisiana webpages](#), to dig deeper into:
 - » [Parish Reports](#)
 - » [Household budgets](#)
 - » [Maps with data for local geographies](#)
 - » [Demographics](#)
 - » [Labor force data](#)
 - » [ALICE data alongside additional Indicators of Well-Being](#)

Connect with stakeholders:

- [Contact your local United Way](#) for support and volunteer opportunities.
- Connect with members of the state [Research Advisory Committees](#) that support this work.
- Find your state and federal representatives and see ALICE household data by legislative district with our [ALICE Legislative District Tool](#).

Turn the ALICE data into action in your community:

- Use the ALICE metrics to highlight the challenges ALICE households face, to inspire action and generate innovative solutions that promote financial stability.

- Armed with the ALICE data, advocate for policy change, apply for grant funding, allocate funding for programs and services targeted to ALICE households, etc.
- Learn more on our [ALICE in Action](#) webpage about the programs, practices, and policies to improve access to affordable housing, high quality child care and education, healthy food, health care, transportation, workforce training, and more.
- Demonstrate potential financial challenges that ALICE workers face with interactive tools from the Federal Reserve Bank of Atlanta that incorporate the Household Survival Budget. These tools, which include the [Policy Rules Database](#) and the [Career Ladder Identifier and Financial Forecaster](#), map changes in benefits along a career path and identify potential benefits cliffs.

Be an ally and advocate for better data:

- Advocate for more accurate data collection by the [U.S. Census Bureau](#) for people who have been [historically undercounted](#), including (but not limited to) people with disabilities, people experiencing homelessness, people of color, individuals who identify as LGBTQ+, and people in low-income and hard-to-count geographic areas.
- Support the [implementation](#) of a single combined question for race and ethnicity. Census [research](#) shows this change will yield a more accurate portrait of how the U.S. population self-identifies, especially for people who self-identify as multiracial or multiethnic.

2021 Point-in-Time Data

Population: 58,200 • **Number of Households:** 21,555 (-3% change from 2019)
Median Household Income: \$42,368 (state average: \$52,087)
Labor Force Participation Rate: 56.3% (state average: 58.5%)
ALICE Households: 33% (state average: 32%) • **Households in Poverty:** 22% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 11,734 households in Acadia Parish were below the ALICE Threshold; in 2021 this number changed to 11,837, (a 1% change).

Households by Income, Acadia Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Acadia Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

To see costs for different household compositions in Acadia Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

Household Survival Budget, Acadia Parish, 2021

| | SINGLE ADULT | 2 ADULTS, 2 IN CHILD CARE |
|----------------------------------|-----------------|---------------------------|

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

2021 Point-in-Time Data

Population: 23,085 • **Number of Households:** 7,687 (-3% change from 2019)
Median Household Income: \$47,660 (state average: \$52,087)
Labor Force Participation Rate: 45.7% (state average: 58.5%)
ALICE Households: 40% (state average: 32%) • **Households in Poverty:** 20% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset Limited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 4,750 households in Allen Parish were below the ALICE Threshold; in 2021 this number changed to 4,580, (a -4% change).

Households by Income, Allen Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Allen Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

2021 Point-in-Time Data

Population: 129,144 • **Number of Households:** 49,418 (-1% change from 2019)
Median Household Income: \$59,041 (state average: \$52,087)
Labor Force Participation Rate: 59.2% (state average: 58.5%)
ALICE Households: 36% (state average: 32%) • **Households in Poverty:** 13% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 24,892 households in Bossier Parish were below the ALICE Threshold; in 2021 this number changed to 24,318, (a -2% change).

Households by Income, Bossier Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Bossier Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

To see costs for different household compositions in Bossier Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

ALICE Households: 37% (state average: 32%) • **Households in Poverty:** 32% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 4,369 households in Claiborne Parish were below the ALICE Threshold; in 2021 this number changed to 3,495, (a -20% change).

Households by Income, Claiborne Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Claiborne Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Evangeline Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

To see costs for different household compositions in Evangeline Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

ALICE IN JEFFERSON DAVIS PARISH

2021 Point-in-Time Data

Population: 32,270 • **Number of Households:** 11,351 (-3% change from 2019)
Median Household Income: \$45,578 (state average: \$52,087)
Labor Force Participation Rate: 53.9% (state average: 58.5%)
ALICE Households: 37% (state average: 32%) • **Households in Poverty:** 18% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 6,115 households in Jefferson Davis Parish were below the ALICE Threshold; in 2021 this number changed to 6,268, (a 3% change).

Households by Income, Jefferson Davis Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Jefferson Davis Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Livingston Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in Plaquemines Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

To see costs for different household compositions in Plaquemines Parish, visit UnitedForALICE.org/Household-Budgets/Louisiana

Household Survival Budget, Plaquemines Parish, 2021

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

ALICE IN POINTE COUPEE PARISH

2021 Point-in-Time Data

Population: 20,951 • **Number of Households:** 8,287 (-8% change from 2019)
Median Household Income: \$50,431 (state average: \$52,087)
Labor Force Participation Rate: 56.1% (state average: 58.5%)
ALICE Households: 32% (state average: 32%) • **Households in Poverty:** 23% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset Limited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 5,407 households in Pointe Coupee Parish were below the ALICE Threshold; in 2021 this number changed to 4,564, (a -16% change).

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

ALICE IN ST. CHARLES PARISH

2021 Point-in-Time Data

Population: 52,411 • **Number of Households:** 18,640 (-3% change from 2019)
Median Household Income: \$72,088 (state average: \$52,087)
Labor Force Participation Rate: 64.2% (state average: 58.5%)
ALICE Households: 30% (state average: 32%) • **Households in Poverty:** 10% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 7,666 households in St. Charles Parish were below the ALICE Threshold; in 2021 this number changed to 7,464, (a -3% change).

Households by Income, St. Charles Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in St. Charles Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

Household Financial Status by Household Type, St. Martin Parish, 2021

ALICE IN ST. MARY PARISH

2021 Point-in-Time Data

Population: 49,818 • **Number of Households:** 18,565 (-7% change from 2019)
Median Household Income: \$43,097 (state average: \$52,087)
Labor Force Participation Rate: 54.3% (state average: 58.5%)
ALICE Households: 39% (state average: 32%) • **Households in Poverty:** 22% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset Limited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 11,603 households in St. Mary Parish were below the ALICE Threshold; in 2021 this number changed to 11,384, (a -2% change).

Households by Income, St. Mary Parish, 2010–2021

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in St. Mary Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

ALICE IN VERMILION PARISH

2021 Point-in-Time Data

Population: 57,775 • **Number of Households:** 21,580 (-2% change from 2019)
Median Household Income: \$56,347 (state average: \$52,087)
Labor Force Participation Rate: 57.4% (state average: 58.5%)
ALICE Households: 26% (state average: 32%) • **Households in Poverty:** 17% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset Limited, **I**ncome Constrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 10,225 households in Vermilion Parish were below the ALICE Threshold; in 2021 this number changed to 9,465, (a -7% change).

Households by Income, Vermilion Parish, 2010–2021

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by parish demographics, community members can move toward more equitable solutions.

Visit UnitedForALICE.org/Louisiana to view more national, state, and parish data.

Household Financial Status by Household Type, West Carroll Parish, 2021

Source: ALICE Threshold, 2021; American Community Survey, 2021

Household Financial Status by Race/Ethnicity, West Carroll Parish, 2021

Note: All racial categories are for one race alone. Race and ethnicity are overlapping categories; the Asian and Black groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race.

| West Carroll Parish, 2021 | | |
|---------------------------|------------------|-------------------|
| Town | Total Households | % ALICE & Poverty |
| Epps | 156 | 63% |
| Kilbourne | 217 | 64% |
| Oak Grove | 627 | 71% |
| Pioneer | 122 | 35% |

Note: Municipal-level data on this page is 1 or 5-year averages for Incorporated Places. Totals will not match parish-level numbers because some places cross parish borders, data is not available for the smallest places, and parish-level data is often 1-year estimates.

ALICE IN WEST FELICIANA PARISH

2021 Point-in-Time Data

Population: 15,334 • **Number of Households:** 3,852 (0% change from 2019)
Median Household Income: \$63,450 (state average: \$52,087)
Labor Force Participation Rate: 47.1% (state average: 58.5%)
ALICE Households: 36% (state average: 32%) • **Households in Poverty:** 14% (state average: 19%)

Financial Hardship Changes Over Time

ALICE is an acronym for **A**sset Limited, **I**ncome Constrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the parish (the ALICE Threshold). Households below the ALICE Threshold – ALICE households plus those in poverty – can't afford the essentials.

As circumstances change, households may find themselves below or above the ALICE Threshold at different times. While the COVID-19 pandemic brought employment shifts, health struggles, and school/business closures in 2021, it also spurred unprecedented public assistance through pandemic relief measures. In 2019, 1,987 households in West Feliciana Parish were below the ALICE Threshold; in 2021 this number changed to 1,927, (a -3% change).

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, child care, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the parish level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2021, household costs in West Feliciana Parish were well above the Federal Poverty Level of \$12,880 for a single adult and \$26,500 for a family of four.
